

REFERENCE LETTER

Tartu, May 2019.

In April 2019, DONTAL GROUP has been providing an internal cleaning of 26 horizontal tanks (75 m³ each) and their pipes at our terminal. The tanks were cleaned after exhaust oil and additionally 4 vertical tanks were cleaned after storing a diesel.

In our opinion, Dontal Group performs an excellent tank cleaning service and is solving all of our challenges and at this field. Dontal Group sees the solutions, and one of their great strengths is JetPetroClean™ equipment.

The cleaning equipment is definitely most complete and has best facilities within its market.
